some final words

Here I stop (for now?) - if I try to put H1...H6 into the tables, the formatting chaos will overwhelm me

. Hunting for the correct nesting of HR, TD, and CAPTION tags was quite a game... Maybe the fact that the alignment does not always work correct is caused by the template. Following the

produced code it should be aligned correctly 😞

Anyone please feel free to modify the code – and please tell me what and why you did so that I can be happy about these modifications in my own wiki 🙏
